

ENVIRONMENTAL MANAGEMENT POLICY

As a company and through the guidance we provide to our clients, G2 Integrated Solutions is committed to sound environmental stewardship through implementation of environmental practices and management strategies. During strategic planning and while assessing business decisions, G2 Integrated Solutions consistently plans to minimize potential environmental impact and ensure environmental sustainability.

G2 Integrated Solution's Commitments:

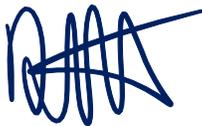

- *Recognize and promote sound environmental practices*
- *Avoid harm to the environment where impacted by its business related activities and services*
- *Ensure that all its entities operate in compliance with local environmental laws, regulations and standards*

In order to meet these commitments, G2 Integrated Solutions will:

- *Establish, implement and maintain a written Environmental Management System and adopt environmentally-sustainable practices at all locations.*
- *Train our employees to the environmental regulations and corporate expectations that affect their day-to-day and job-specific tasks, and track our employees' environmental training and performance. As appropriate, train project field personal to risk-specific incident responses and reporting obligations*
- *Request and assess potential sub-contractors' environmental management programs as a prerequisite and ongoing contractual obligation, and ensure that sub-contractors' programs are consistent with both regulatory obligations and client expectations*
- *Include environmental response planning within project Health and Safety Plans, if the potential for an environmental incident is apparent*
- *Record and assess environmental near-misses and incidents and promote "lessons learned"*
- *Review this policy on a regular basis and audit the implementation of the policy to ensure that it is being executed by both field and office personnel*
- *Comply with Local, National and International environmental laws, regulations and standards, when applicable*

This policy statement and referenced Environmental Management System have the absolute support of Senior Management who shall have the ultimate responsibility for ensuring the management system's effectiveness.
